## Hammer Mill

### Молотковая Дробилка

**“Powerful Grinding for Maximum Feed Efficiency”**

Our Hammer Mills are designed to deliver efficient and uniform grinding of various raw materials used in feed production. The optimized rotor design and precision-engineered hammers ensure consistent particle size distribution, improving mixing quality and enhancing feed conversion rates.

**High Performance**

Высокая  
производительность

**Less Energy**

Меньше  
Энергии

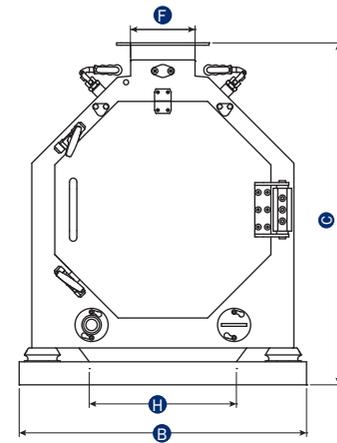

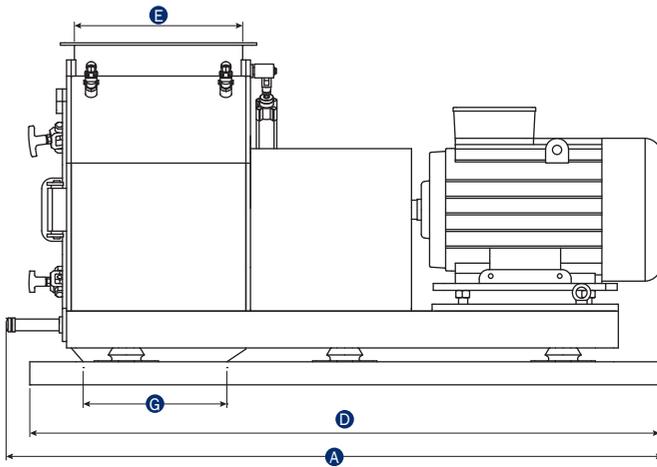

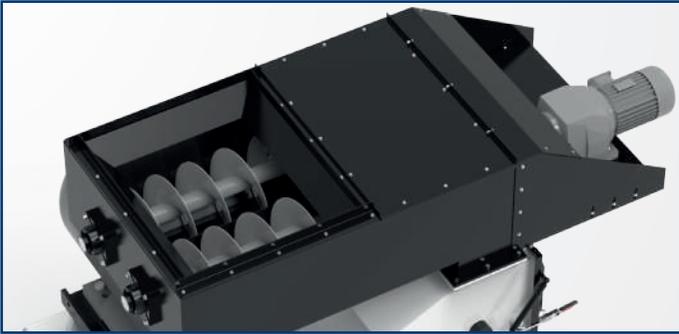

**Maximum Capacity**

Максимальная  
емкость

Equipped with a high-performance motor and advanced airflow system, the Hammer Mill achieves superior grinding results with reduced energy consumption. Its balanced structure minimizes vibration and wear, ensuring smooth and stable operation even under continuous, heavy-duty use.

Built with durable, wear-resistant components, the Hammer Mill is engineered for long service life in demanding industrial environments. The user-friendly design allows easy access to internal parts, making cleaning, inspection, and maintenance fast and efficient — minimizing downtime and maximizing productivity.

Type Model	A	B	Bmax	C	D	E	F	G	H
