“Consistent Drying, Superior Feed Quality”

Flake Drying Systems are designed to ensure uniform moisture removal from feed flakes while preserving their nutritional value and structural integrity. The controlled temperature and air distribution system prevent over-drying or nutrient loss, guaranteeing high-quality final products.

Equipped with advanced heat recovery and airflow control technology, these systems achieve maximum drying efficiency with minimal energy consumption. Their stable operation ensures continuous production with optimized performance in every batch.

Manufactured from high-grade, corrosion-resistant materials, the system provides long-term durability in demanding industrial environments. The user-friendly control panel allows easy monitoring and adjustment of drying parameters, simplifying operation and maintenance.

Type Model	A	B	C	Motor Power Motor (kW)	Capacity Kapasit (t/h)
