

# Yağ Kaplama Oil Coating Финишный Напылитель

## “Uniform Coating for Enhanced Feed Quality”

The Oil Coating Machine is designed to evenly apply oil, molasses, or other liquid additives onto pelletized feed. By ensuring uniform coating on each pellet, it enhances the nutritional value, flavor, and energy content of the final product, improving feed quality and animal performance.

### High Performance

Высокая  
производительность

### Less Energy

Меньше  
Энергии

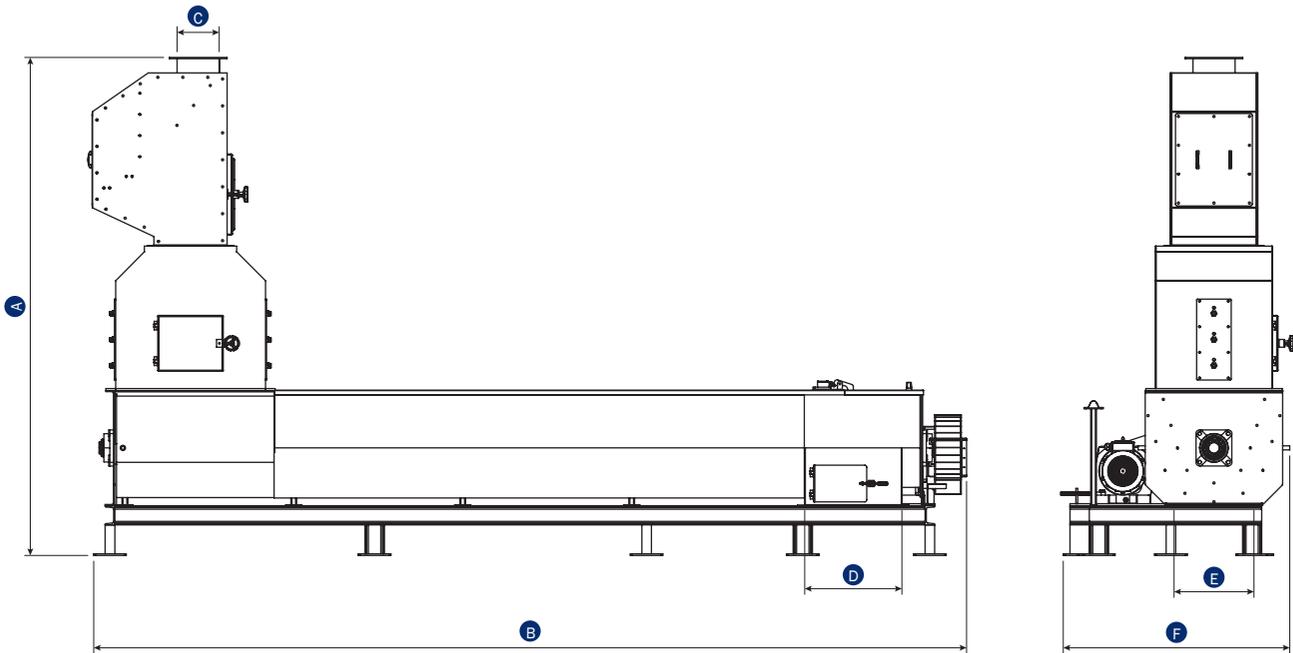

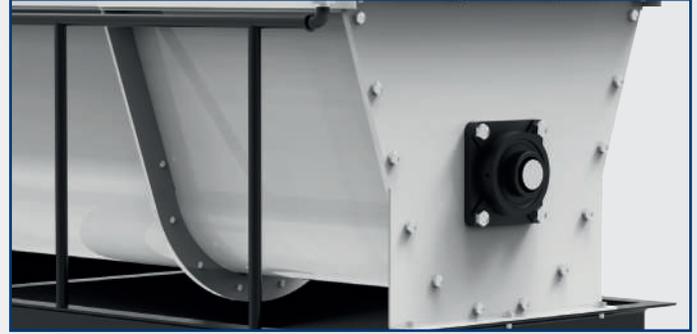

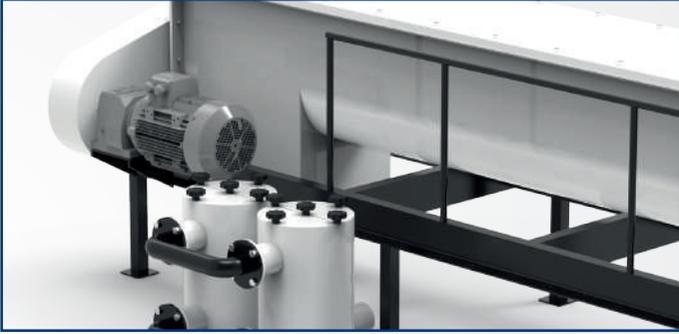

### Maximum Capacity

Максимальная  
емкость

Equipped with a precision spraying system and adjustable flow controls, the machine provides consistent application rates for different product types and capacities. Its efficient design allows for quick setup and smooth integration into existing production lines, supporting high output with minimal waste.

Manufactured from stainless steel and corrosion-resistant materials, the Oil Coating Machine is built for long-term, hygienic operation in demanding environments. Its accessible design ensures easy cleaning, inspection, and maintenance, reducing downtime and ensuring stable, reliable performance.

Type Model	RPM Devir (dev/dk)	A	B	C	D	E	F	Capacity Kapasit (t/h)
